

**Barcaldine Regional Council**  
**Revenue Statement for the year ended 30<sup>th</sup> June 2016**

This Revenue Statement is prepared in accordance with Section 104 (5) of the *Local Government Act 2009* and Section 172 of the *Local Government Regulation 2012*.

The Revenue Statement outlines the revenue measures adopted by Barcaldine Regional Council for the 2016 financial year.

**Differential General Rates**

Barcaldine Regional Council will levy differential general rates for the financial year ending 30 June 2016 in accordance with Section 80 of the *Local Government Regulation 2012*.

In determining the differential rating categories, Council has taken into account the following factors:

- The rateable value of the land and rates which would be payable if only one general rate was levied;
- The level of services provided to that land and the cost of providing those services compared to the rate burden that would apply under a single general rate;
- The use of the land in so far as it relates to the extent of utilisation of Council's services; and
- The location of the land and the access to services.

The number of visitors, including tourists with caravans and motor homes, to the Barcaldine Region is increasing every year. These visitors have an impact on Council roads, public conveniences, camping areas (especially free camping) and the provision of tourist information services.

Accordingly, Council has adopted a system of categorisation for public accommodation facilities based on the number of rooms, sites and/or cabins.

Barcaldine Regional Council is affected by mining and mining related activities and it has carefully considered the impacts that these particular land uses are having on the ability of Council to deliver the desired levels of service to the community.

These impacts include:

- the increase in Council's wage costs in an endeavour to compete with high mine incomes;
- increased staff turnover;
- accommodation difficulties, in terms of both availability and affordability;
- increased visitation by contractors utilising Council services and infrastructure;
- rapid deterioration of public infrastructure; and
- the need for additional health, environmental, planning and community services.

Accordingly, for mining activities, Council has adopted a system of categorisation using mine employment figures to split mines into a number of categories. Mine accommodation facilities will also be particularly categorized, based on the number of accommodation units provided.

## **Utility Charges – Water**

Barcaldine Regional Council levies a **Water Utility Charge** in each community.

The communities of Alpha, Jericho and Barcaldine have a 2-part Water Utility Charge consisting of:

- a. a fixed water access charge for the infrastructure that supplies the water (including a base allocation of water); and
- b. a variable charge for using the water in excess of the base allocation.

The communities of Aramac and Muttaborra have a Water Utility Charge based on the estimated water usage of each consumer.

A water utility charge is also applied to a parcel of land that is located within a designated town area and that is not connected to Council's water supply network but which has the ability to access the water supply network.

Council also provides water to some parcels of land outside a designated town area. These parcels are levied a Water Utility Charge at the same rate as a private residence.

Where a rates assessment comprises more than one parcel of land, the first parcel will attract the applicable Water Utility Charge according to the use. The second and subsequent parcels of land on the same assessment will each attract an **Additional Parcel Water Access Charge**. Excess water charges shall apply for water usage in excess of the combined total allocation.

Where a business or land use covers more than one rates assessment, water utility charges will apply as if all parcels of land were on the one assessment. The applicable water allocations for each assessment shall be combined to provide a total water allocation for that business or land use. Excess water charges shall apply for water usage in excess of the combined total allocation.

Where a business or land use is connected by more than one water meter, the total use is calculated by adding the usage recorded on each water meter.

### *Concessions*

Council provides a concession of 50% of water charges (including excess water charges) to sporting, recreational, religious, cultural, charitable and horse racing non-profit organisations.

### *Excess Water Charges*

Council levies excess water charges on consumption in excess of the base allocation nominated in the tables below.

Council will read meters and levy excess water charges based on consumption recorded as at 1 June 2016. A water meter is taken to have been read on the 1 June 2016, notwithstanding that the meter may actually be read during a period that starts 2 weeks before, and ends 2 weeks after, this date.

The due date for which excess water charges must be paid is 25 July 2016. Interest will apply on charges outstanding at this date. Council does not allow a discount early payment of excess water charges.
